Title: Microsoft Windows 2000

Network Analysis and

Troubleshooting

Version: DEMO

| 1. SNTP is a protocol used to: |
|---|
| A. Replace NetBIOS |
| B. Synchronize time |
| C. Transfer mail |
| D. Register and resolve host names |
| Answer: B |
| 2. Which term describes a database of forest-wide information in Windows 2000? |
| A. Global Catalog |
| B. Tree |
| C. Realm |
| D. Domain |
| Answer: A |
| 3. In, the concept of a read-only BDC is gone. |
| A. Legacy NT 4 domains |
| B. Active Services |
| C. SMTP |
| D. Active Directory |
| Answer: D |
| Allswer: D |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active |
| |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information?A. Trees |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information?A. TreesB. Global Catalog |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information?A. TreesB. Global CatalogC. Enhanced DNS |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information?A. TreesB. Global CatalogC. Enhanced DNSD. Realms |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. A. True |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. A. True B. False |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. A. True B. False Answer: B |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. A. True B. False Answer: B 6. Kerberos is a protocol used to: |
| 4. Which term describes a database of forest-wide information that holds an abbreviated listing of Active Directory Information? A. Trees B. Global Catalog C. Enhanced DNS D. Realms Answer: B 5. True or False? In Windows 2000, BDCs are read-only controllers, just as with NT. A. True B. False Answer: B 6. Kerberos is a protocol used to: A. Replace NetBIOS |

| Answer: C |
|--|
| 7 is accessed via LDAP protocols. |
| A. LSARPC |
| B. Active Directory |
| C. HTTP |
| D. Kerberos |
| Answer: B |
| 8. WINS is in a Windows 2000 environment. |
| A. Available, but may be turned off |
| B. Removed completely |
| C. Used in preference to Active Directory |
| D. Replaced by Browser protocol |
| Answer: A |
| 9. Active Directory is a directory service. |
| A. Linear |
| B. Flat |
| C. Embedded object |
| D. Hierarchical |
| Answer: D |
| 10. Direct Hosting (SMBTCP) is a protocol "shim" used to: |
| A. Replace NetBIOS |
| B. Access directory services |
| C. Authenticate |
| D. Register and resolve host names |
| Answer: A |
| 11. The LDAP protocol is used by a domain DHCP server to determine if it is |
| A. In a domain or workgroup |
| B. Operating within its scope |
| C. Using APIPA or RFC 1918 addresses |
| D. Authorized to issue IP addresses |
| Answer: D |
| 12. When a DHCP server comes on-line in a domain, it will query to discover if it is authorized to |
| provide DHCP services. |
| A. Another DHCP server |

- **B.** Active Directory
- C. Local routers
- D. APIPA clients

Answer: B

- 13. DHCP packet format is compatible with _____
- A. SMB
- B. PPP
- C. SLIP
- D. BOOTP

Answer: D

- 14. DHCP Relay is used when:
- A. DHCP clients are separated by a router
- B. DHCP servers are separated by a router
- C. DHCP clients and servers are separated by a router
- D. DHCP server is also the DNS server

Answer: C

15. The image below is a view of the Sniffer Portable Summary window.

| _ | - | | | |
|---|------|----------------|------------------------------------|-----------|
| 1 | | | Request, Message type: DHCP Inform | 0.000.000 |
| 2 | srv1 | [255.25! DHCP: | Reply, Message type: DHCP Ack | 0.000.287 |
| 3 | srv1 | [255.25! DHCP: | Request, Message type: DHCP Inform | 8.012.313 |
| 4 | | | Reply, Message type: DHCP Ack | 0.000.281 |
| 5 | | | Request, Message type: DHCP Inform | 7.461.313 |
| 6 | srv1 | [255.25! DHCP: | Reply, Message type: DHCP Ack | 0.000.271 |
| 7 | | | Request, Message type: DHCP Inform | 8.011.140 |

If a Windows NT DHCP server sees this exchange from an authorized domain Windows 2000 DHCP server, it will:

- A. Cease issuing IP addresses
- B. Begin issuing IP addresses
- C. Self-authorize
- D. Have no effect

Answer: D

- 16. Which DHCP server message is sent to a client refusing a request for configuration?
- A. Discover
- B. Offer
- C. NAK
- D. Decline

Answer: C

| 17. Which DHCP client message is sent to a server relinquishing a network address and canceling the |
|---|
| remaining lease? |
| A. Discover |
| B. Offer |
| C. Request |
| D. Release |
| Answer: D |
| 18. APIPA addresses are in the range: |
| A. 10.0.0.0/24 |
| B. 172.16.0.0-172.32.255.255 |
| C. 192.168.0.0/16 |
| D. 169.254.0.0/16 |
| Answer: D |
| 19. What does the DHCP protocol provide to a client? (Choose all that apply.) |
| A. IP address |
| B. Dialect negotiation |
| C. Default gateway |
| D. Subnet mask |
| Answer: ACD |
| 20. Which DHCP client message is sent to a server requesting offered configuration parameters? |
| A. Discover |
| B. Offer |
| C. Request |

D. Ack

Answer: C
