**Exam:**           **EPM-DEF**

**Title:**            **CyberArk Defender - EPM**

**Version:**        **DEMO**

1.DRAG DROP

Match the Trusted Source to its correct definition:

|                      |                  |   |
|----------------------|------------------|---|
| Software Distributor | Drag answer here | A specific URL that the organization trusts, which contains approved applications |
| Updater              | Drag answer here | List of predefined updaters, including Java Windows Update                        |
| URL                  | Drag answer here | Network Shares which act as trusted repositories for approved Applications        |
| Network Location     | Drag answer here | Applications distributed from software deployment system, e.g. SCCM               |

Answer:

|                      |                      |   |
|----------------------|----------------------|---|
| Software Distributor | URL                  | A specific URL that the organization trusts, which contains approved applications |
| Updater              | Updater              | List of predefined updaters, including Java Windows Update                        |
| URL                  | Network Location     | Network Shares which act as trusted repositories for approved Applications        |
| Network Location     | Software Distributor | Applications distributed from software deployment system, e.g. SCCM               |
